Presented by **Phil Diekemper**, MBA, BS-CE (Structures), PRO Executive Director, Senior VP of Ceko Concrete Construction (Retired)

****Why PRO?*** Concrete construction productivity growth lags behind other sectors. PRO was established to advance structural design, optimize labor and materials, and facilitate rapid industry changes. Through collaboration, PRO aims to identify and address productivity challenges in concrete construction. PRO invites industry leaders to engage and share PRO's innovative vision, discuss initiatives, demonstrate resources, and explore membership opportunities.
